

# PROJECT DEVELOPMENT WORKPLAN

PROJECT TITLE	Classroom	COMPANY NAME	Classroom Ltd
PROJECT REQUESTOR	NYUAD	DATE	4/12/20

PHASE		DETAILS	Apr																												May															
			Week 1								Week 2								Week 3								Week 4								Week 5											
Sprint	Stage of process		5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	1	2	3	4	5	6	7	8										
1	Communication/Planning	- Requirement gathering	Req Gathering																																											
		- Function points analysis	FPA																																											
		- Feasibility study	Feas. Study																																											
		- System request	System Request																																											
2	Modelling	- Produce use case model											Use case model																																	
		- Produce activity diagram											Activity Diagram																																	
		- Produce sequence diagram											Sequence diagram																																	
		- Produce class diagram											Class diagram																																	
3	Construction	- Backend and database design																	Backend & DB																											
		- Frontend design																	Frontend																											
		- Unittesting																	Unittesting																											
		- Integration testing																	Integration T.																											
4	Deployment	- Deployment on G. Cloud																							Deploy																					
		- Validation testing																									Validation																			
		- System testing																													System testing															
5	Release	- Invite seed users to beta test																											Beta test																	
		- Study system performance																															Study performace													
		- Plan next sprints																																			Plan									
			PROJECT END
